Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, it is unclear how the fluid is being forced from said housing towards said first medical implement. Is it when the devices are fluidly connected or when gravity force the remaining fluid in the housing towards the first medical implement or is it the element in the valve forcing the fluid towards the first medical implement or combinations thereof?

As to claim 5, it is unclear what applicant regards as a member.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Pfister U.S. Pat.

No. 4,334,551.

Art Unit: 3763

Pfister discloses a method of effecting a positive flow of fluid through a first medical implement automatically upon disconnection of a second medical implement from a valve having a housing with an element therein for controlling the flow of fluid through said housing, said valve defining a fluid volume within said housing and said valve in communication with said first medical implement (Figs. 1A-1C), comprising the steps of: disconnecting said second medical implement from the said valve (11); moving at least a portion of said element to a position in which fluid flow through said valve to said second medical implement is prevented (figs. 1A and B); and forcing fluid from said housing towards said first medical implement (fluid remaining in the housing will be forced to the first medical implement by gravity); as to claim 2, (fig. 1C); as to claim 3, (the examiner regards 23 as a piston); as to claim 4, (figs. 1B and 1A); as to claim 5, the examiner regards (24) as a member, since the examiner is unclear what applicant regards as a member; as to claim 6, (see claim 5 rejection); as to claim 7, (figs. 1A-1C).

Conclusion
